RIGZONE SERVICES provides a complete solution for lifting products and services from product supply, repair and maintenance, inspection and test, contract hire, training, certification management through to complete management systems.

RIGZONE has personnel with reputation for providing innovative solutions to lifting problems and has a proven record of saving their customers money through product selection and tailored written schemes of examination.

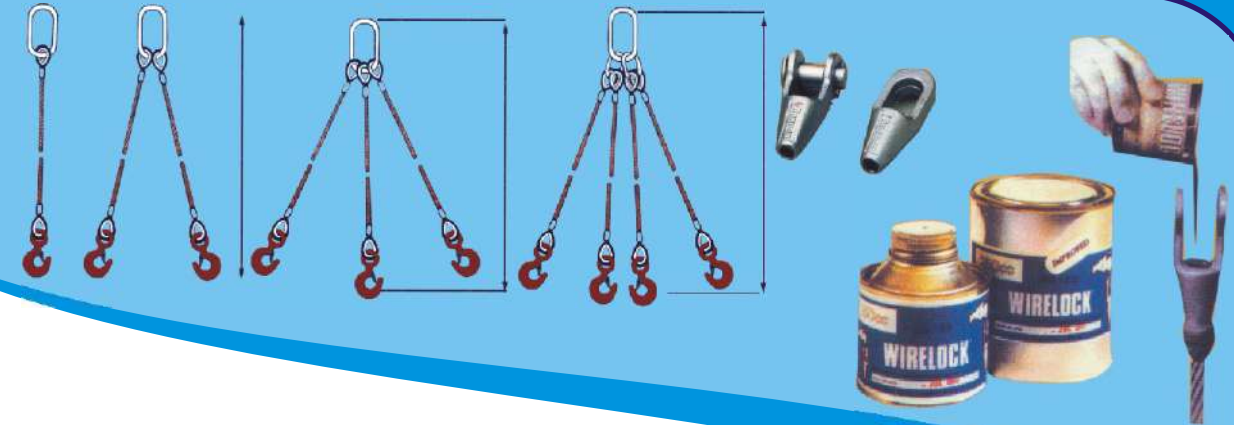

✓ Certification, Testing, Repair and Inspection of Lifting gear (Equipment) and Shipping units for on/offshore installations in accordance with BS 7072, BS EN 12079 and DNV 2.7-1, whichever the equipment/unit complies to. Supply, Inspection and Management of all fixed and portable Lifting equipment on various sub sea R.O.V./Dive systems.

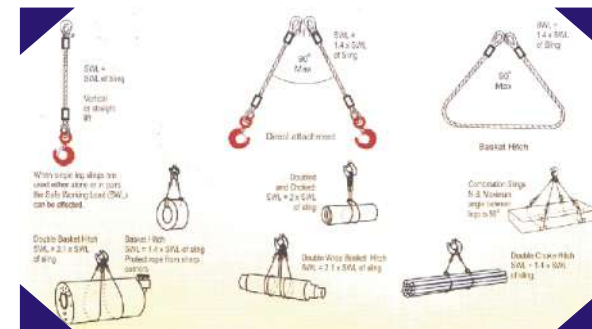

✓ Six monthly survey of all Lifting equipment in accordance with SI 2307 (LOLER);

✓ At the request of the Customer, Engineers will visit site every six months to perform a thorough inspection of all Lifting gear. The completed per day job includes the thorough examination and colour coding of each item and the updating of the equipment register/database as the case may be. The Engineers basically will produce an e-report of examination from their laptop on completion of the visit. (The report of the Initial survey may be done in our office, if a database has to be created manually).

TEST & INSPECTION

RIGZONE provide Inspection services from loose lifting gear inspection and thorough examination to fixed lifting gear inspection and thorough examination. A complete service for test and certification either on site or within RIGZONE facilities is available..

RIGZONE have qualified service engineers who can perform this service locally. These are backed up by central support functions where required

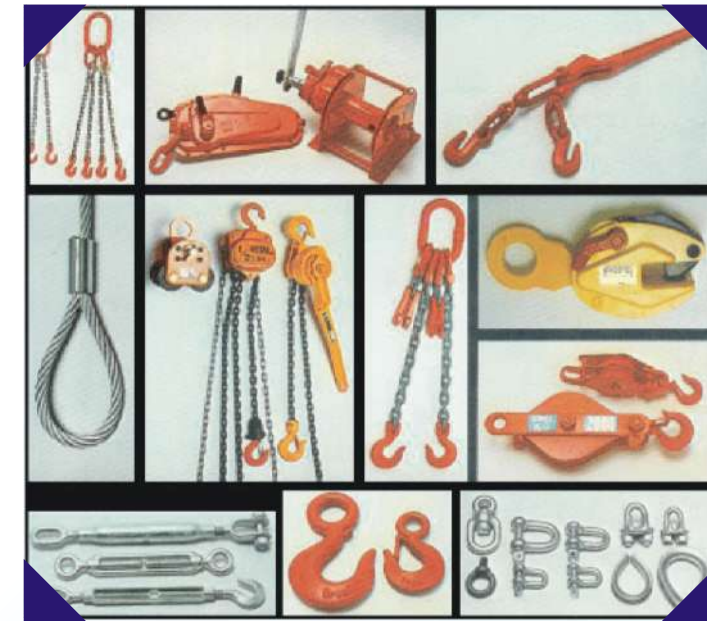

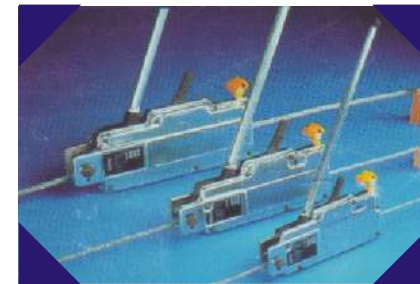

TRAINING

Rigzone Services undertake training courses of quality standard with manuals .This includes Rigging and Lifting Awareness, Banksman and Slinger, Forklift Operations, Pedestal Crane Operator Training, Mobile and Overhead Travelling Crane Inspection etc. Trainings are undertaken in house by highly trained trainers at our Pre-scheduled venue or at client base. Duration of each course are determined by the course outline/requirement. (Ask for separate profile of Training Courses).

Maintenance Programme

This is monitored very closely as only limited maintenance can be done in the field especially to Lifting machines. Equipment lubrication can be performed and maintenance requirements scheduled during each six monthly inspection.

Lifting Equipment Supply and Hire With the personnel of great experience we render supply of lifting equipment which are fit for purpose and efficient for the lifting requirements in accordance to standard as required by our customer
